Dear Mr Gomez,

Re: MONTERO BELPA CSA-320 (Gasket Material)
AGA Application 12807, AGA Certification 6427

I refer to your Application for Modification and our recent email correspondence regarding the product referenced above.

This Application is for changes to product already certified under coverage of AGA certification **6427** and the modifications/variations concern:

- Certification update to the latest revision of the reference standard – now AS4623-2008.
- Update of manufacturer name change on certification documentation following your advice and submission to AGA.

Following a desktop review of the certification file and revised specification information I confirm no further assessment is required. Evidence of product marking which satisfies Standards markings requirements has been received. I also confirm specification documents in our certification file have been updated accordingly.

All work for this current project is now complete and I am pleased to enclose the following:

- Revised AGA Certificate **6427**.
- Revised Product Specification Issue **02**.
- Details of the certification entry as it will appear in the "Directory of AGA Certified Products", as found on our website www.aga.asn.au.

Please review the enclosed documentation and advise if any details are incorrect or inadequate.

Yours Sincerely,

A handwritten signature in black ink that reads 'John Vanderzon'.

For,
Don Duan
Client Manager, AGA
